On December 9, 2022, two staff tested positive: one CNA from resident unit 1-400 and one administrative support staff with limited resident contact. We are continuing to test staff twice/week until further notice. Residents who had close contact with the residents or staff who tested positive are tested in accordance with regulatory requirements. Residents who tested positive are residing on resident unit 2-400 "C" section until transmission-based precautions are discontinued. To date, since the beginning of the Outbreak on November 23, 2022, thirteen residents and thirty-one staff have tested positive. Ten of the thirteen residents are fully-vaccinated. Nine residents received the bivalent booster. Three residents completed the transmissions-based precautions period and returned to their units. The thirty-one staff are fully-vaccinated. Seven of the staff received the bivalent booster. Eight staff completed the transmission-based precautions period and returned to work.

Patrick Kuiken, RN, Infection Preventionist is continuing to administer the bivalent booster vaccines to those who are eligible to receive the booster and who consent to receive it. To date, 73% of residents and 44% of staff received the bivalent vaccine.

Influenza activity is high as reported in the New Jersey Department of Health Surveillance Reports. To date, 86% of residents and 77% of staff received the influenza vaccine. As a reminder to staff, December 31, 2022, is the deadline established by the New Jersey Department of Health to receive an Influenza vaccine or to submit a medical exemption that meets the criteria established by the New Jersey Department of Health. Staff who do not comply by the deadline may not work.
